

Asset Management and CMOM Programs for Gravity Sewer Systems**Class will be held January 13-15, 2003, in Birmingham, Alabama****Earn 2.10 CEU or 21 PDH Credits**

This seminar focuses on the asset management business practices needed to successfully manage the operation and maintenance of the gravity sewer system. An adequate, well maintained collection system is essential to the health and safety of the public and the economic development of the community. These systems must be managed effectively to provide a high level of customer service and to comply with federal, state and local regulations and laws, particularly the Sanitary Sewer Overflow (SSO) rule and Capacity, Management, Operation and Maintenance (CMOM requirements). Agencies that fail to manage O&M programs will face increasing liability and resulting costs due to fines, litigation and catastrophic failures in the collection system. Guest instructors provide an in-depth perspective on "real world" practices, issues, and solutions.

How to Enroll**Who Should Attend:**

- Utility Managers
- Collection System Managers
- Collection System Operators
- Engineering Managers
- O&M Staff
